

Sustainable Research Practice: An introduction

Further activities

These activities can be used to further your exploration of sustainable practice.

Mapping Research to SDGs

Task: Use the UCC toolkit to map out your research against the SDGs.

Tools

- [SDG Mapping Tools | University College Cork](#)

Other Resources

- [Report: Mapping research to advance the SDGs | Elsevier](#)
- [Getting started with the SDGs in Universities | Sustainability Exchange](#)

[THE 17 GOALS | Sustainable Development](#)

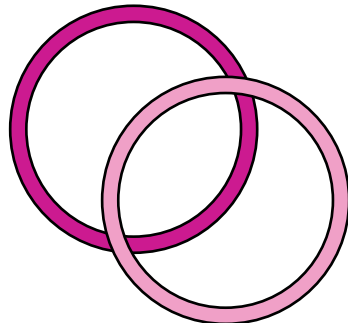

Travel Itinerary

- Choose a destination.
- Review the Lancaster University travel decision tree. Sustainable Business Travel guidance can be found *via* this link: [Sustainable Business Travel Guidance](#)
- Explore ways to travel there using low carbon methods.

Design a sign or label

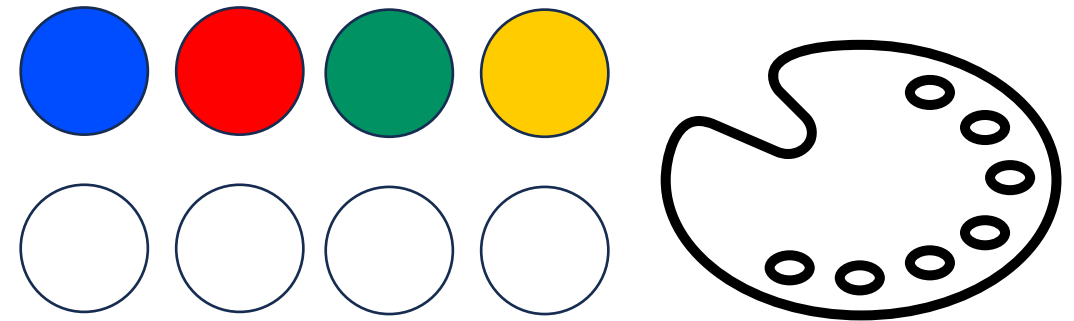

Example of designing clear signage: The Olympics and Paralympics

- There was a challenge in providing additional direction signage in cities, such as Paris and London, which already have a lot of signage. Pink was an effective colour choice.
- [Behind the scenes of the signage for the Paris 2024 Olympic and Paralympic Games](#)
- [London Olympics... wayfinding. helping you find your way using colour](#)
- [Sign; London 2012 Olympics and Paralympics sign showing dates and advice, 2012 | London Transport Museum](#)

Design Task

- Review the colour palette of signage in your department.
- Note that the colours of health and safety signs are an important aspect of emphasising their meaning.
- Can you select a colour and layout for sustainability messaging?

Acknowledgements

This activity set was developed as part of the Lancaster University “Sustainable Research Practice: An introduction” training.
